

**CONTAMINATED SOIL ~ STATEMENT OF RESPONSIBILITY**

---

The undersigned hereby acknowledges that he/she, individually or as an agent for an entity identified below (hereinafter "DEPOSITOR"), has brought to the Campbell County Landfill (hereinafter "LANDFILL") located at 909 Westover Road, Gillette, Wyoming, soil for disposal which may or may not be contaminated with hazardous elements.

Upon delivery of soil to the LANDFILL, DEPOSITOR will remit the sum of One Hundred Twenty Five dollars (\$125.00), which will be used in whole or in part, for testing to determine the level of contamination in the soil after the prescribed treatment period. Depending upon results of these tests, the soil may or may not be transferred from the treatment center to a disposal site at the LANDFILL. The tests may indicate that other arrangements must to be made, which includes but is not limited to: further testing, treatment, and/or transportation to another facility. Thus, it is hereby agreed and understood by DEPOSITOR that any expense incurred by said testing, treatment, or transportation is the liability and sole responsibility of the DEPOSITOR and the DEPOSITOR agrees to remit in full to, or otherwise reimburse and indemnify the LANDFILL of all additional costs incurred.

In addition, it is hereby recognized, agreed, and understood by DEPOSITOR of DEPOSITOR'S continued responsibility for any and all soil delivered to LANDFILL by DEPOSITOR. This includes but is not limited to testing, treatment, transportation to another facility, clean-up costs, or liability under RCRA or CERLA actions. DEPOSITOR hereby agrees to hold harmless and indemnify the LANDFILL for any liability or costs incurred by accepting the soil.
